

# D710

## A MULTI-PURPOSE DISC HARROW

### Perfected through 30 years of production

The Agrico D710 is a multi-purpose disc harrow suited for stalk chopping and the preparation of perfect seedbeds. A heavy duty implement with an optional folding frame for easy storage and transport.

### The Agrico D710 is a modern, heavy duty implement

- A frame of 200 x 150 mm rectangular tube. Optional folding frame for easy transport and storage.
- Triple sealed, self aligning ball bearings, mounted in shock absorbing rubber rings.
- Gang bolts of 45 mm round high tensile steel, with 285 mm disc spacing.
- Working depth can be set steplessly from 0 to 250 mm by means of an adjusting screw.
- Gang beams and drawbar can be adjusted continuously to suit conditions.
- Levelling mechanism with springs keeps the frame parallel to the ground.
- High flotation tires and a transport clearance 400 mm.
- Adjustable disc scrapers of hardwearing steel plate.
- Furrow filling discs at the outside of each gang, to ensure level fields.

More than 100 years of service

## ABOUT THE BLADES

Exclusive parabolic disc blades give the aggressive penetration of conical blades, with the superior strength of spherical blades. The discs are notched for improved penetration and better stalk chopping.

Standard Ø630x6 discs | Optionally available with Ø630x10, Ø710x6 & Ø710x10 mm discs

## SPECIFICATIONS
